Optimize Operations with Outsourced Services

Accounting, Payroll, Benefits Administration,
& Reporting for Multi-Unit Companies

The Problem

Multi-unit companies require expert staff and leading technology to perform key business processes such as Accounting, Payroll, Benefits Administration, and Operational Reporting.

Unfortunately, many companies don't have the resources to invest in the people and technology they need, leaving leaders and teams overwhelmed, distracted, and falling behind.

- Books don't close in a timely manner and the lack of timely, accurate data hinders strategic financial decisions.
- Outdated legacy systems don't integrate well together creating manual processes and increased data entry errors. Updating technology is a huge investment and most companies lack the resources to do so.
- Lack of industry expertise makes hiring, training, and managing back-of-house staff difficult, costly, and time consuming.
- Industry changes like regulations, inflation, supply chain disruption, and the labor shortage create challenges for business leaders. Leaders who are managing daily operations don't have the time or resources to tackle these ongoing challenges, much less focus on customers, culture, strategy, or growth.

The Solution

At InfoSync, we believe you should be focused on strategic business priorities, not administrative processes. That's why we provide the people, processes, and technology with outsourced Accounting, Payroll, Benefits, and Reporting.

We work to reduce costs, provide access to updated technology, and deliver industry insight and expertise so leaders can shift their focus from administrative tasks to leading their company toward growth and success.

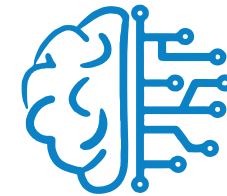

Adapt and Scale

A lean operations team makes your business agile so you can move and scale with ease.

Protect Your Business

Adapt to changing regulations with expert compliance.

Work Smarter

Leverage leading HRIS and Reporting technology without the large investment.

Improve Profitability

Timely financials deliver the ability to react and make smart business decisions.

Save Time on Processes

Streamlined payroll, open enrollment, tax returns, and documentation.

See Results

Receive drill-down reports with data from all of your systems in one place.

Customer Case Studies

InfoSync helps multi-unit clients grow by delivering access to updated technology, industry expertise, and best practices through outsourced Accounting, Payroll, Benefits, and Reporting. With InfoSync, leaders are able to focus on strategic business priorities, save time and money, and scale as needed

INFOSYNC®

Helped a Quick Service Restaurant Grow from 5 Locations to 700+

“When you’re bringing on additional stores with an in-house accounting and payroll staff, you have to hire more employees to accommodate the additional workload. The number of employees to staff a store alone adds a large amount of payroll responsibility. However, with InfoSync as a partner, scaling is much easier because you’re working with a team of people who are already in place, know you well, and understand your specific business needs.”

Delivered 80% Time Savings on Open Enrollment for a Fast-Casual Franchisee.

“Our open enrollment process is very efficient. We’re not putting packages together and distributing them to employees, and employees aren’t thumbing through pages of benefits material, filling out forms, and turning them in. Employees can go online to view benefit plan options tailored specifically to the employee, and quickly select the benefits they choose to enroll in. This open enrollment process has provided an 80% time savings for our staff because we don’t have the paperwork we used to have. That time savings is 100% driven by the HRIS platform powered by InfoSync.”

Helped a Casual Dining Franchisee Double Their Locations

“We outsource almost everything. We have a very small corporate team, so we have eliminated a lot of overhead by outsourcing because we don’t need the office space, and we don’t have a large staff to manage. If we were performing these processes in-house, in our own office, we would have to purchase technology and software and worry about security upgrades and back-up. The fact that InfoSync takes care of all of those things for us is a huge weight lifted off our shoulders.”

Get Started

Contact sales@issvc.com to set up a discovery call.

1. Discovery Call

Our team will get to know you, your business, what hurdles you are facing, and your future goals.

2. Create a Plan

Based on your business needs, our team will work with you to create a service package that's right for you.

3. Contract

Once we determine a plan, we'll create a responsibility matrix that we will sign state the services you will receive.

4. Go-Live

Our team will transition you onto our services so you can begin to realize time and cost savings and focus on what's most important to you; your customers!

5. Support

You will have access to ongoing support, best practices, and industry expertise.
